Sierra Development Assurance Services

Sierra Development has 30+ years experience helping companies grow and mature their cybersecurity, compliance, business continuity, and risk management programs. As a Riverside portfolio company, we understand the expectations and challenges our clients face.

For small and mid-size businesses, it may be difficult to justify the expense of adding full-time staff and new capabilities without fully understanding your company's security and compliance needs. At the same time, your board of directors has expectations for the protection of Riverside's assets. Our fund manager recognized this challenge and chartered a service within Sierra Development to help portfolio companies manage this need without incurring unnecessary operating expenses. Our services are tailored to address your needs so that you can focus on what you do best.

■ CYBERSECURITY

It **IS POSSIBLE** to mature your security capability without impeding operations. Let us show you how!

■ COMPLIANCE

A well-managed Compliance Program can be a business enabler, opening new verticals and streamlining deal closure.

■ RISK MANAGEMENT

Every company that ever failed, neglected to recognize and/or treat at least one risk properly. Are you managing the risks that will help you to succeed?
